

Dear Commissioners,

I strongly urge you to dismiss the NAB petition 04-160 which is an infringement of the public's right to decide and is designed through legislation restrict the public's rights to purchase and decide which services they wish receive.

The NAB in it's petition is attempting to convince the commission that they should legislate monopoly rights to a licensed for profit business. This county was built and has been made great through free enterprise and I urge the commission keep business free and dismiss this self-serving petition submitted by the NAB.

Respectfully,

James Lencioni
